EDUCATION

Bachelor of Computer Science

UNIVERSITAS INDONESIA

Aug 2022 – Aug 2026

- Fresh Graduate, Major in Information Systems | GPA: 3.51

HONORS & AWARDS

[International, Jun 2025] Champion (1st) IDEAS 2025 - Business Plan Competition || by Faculty of Economics and Business, Universitas Gadjah Mada

- Developing Moelung, an integrated digital platform that empowers Indonesia's informal waste sector and promotes a circular economy. Moelung modernizes and formalizes the role of waste pickers ("Penyetoer") through a tech-driven ecosystem combining a mobile app and physical collection points ("Tikoem"). The platform enables transparent and efficient waste transactions, incentivizes participation, and ensures traceable recycling flows. [Link Portfolio](#)

[National, Sept 2024] Champion (1st) Young Entrepreneur Week 2024 Business Plan Competition || by Faculty of Economics and Business UIN Syarif Hidayatullah Jakarta

- Developing an IoT security device innovation called SafeIN. SafeIN is a smart card integrated with an application designed to minimize the loss of valuable items in public spaces. This smart card can be attached to various items such as phones, bags, or other valuables.

[National, Oct 2024] Runner-Up (2nd) of Vivace Innovazione 2024 Business Plan Competition || by Faculty of Economics and Business Universitas Lambung Mangkurat

- Creating the Foody Application, FOODY is an intelligent and reliable solution within the FnB industry. With a vision to provide convenience to customers through an integrated service aimed at preventing food waste through preventive and solution-oriented efforts, FOODY emerges as a trusted link from upstream to downstream. This includes purchasing food ingredients, calculating food requirements, and distributing to integrated Food Waste processing partners, all within a single application.

WORK EXPERIENCE

[Shopee](#)

• **[June 2026 – Now] Associate Product Manager:**

- Led product development across **4 core logistics domains including Linehaul Supply Chain, Vendor, Fleet, and Finance**, delivering multiple system improvements that contributed to **30% fewer operational issues and 25% faster issue resolution** across critical logistics workflows.
- Developed **automated Vendor and Transfer Order Allocation systems**, converting complex operational constraints into configurable decision rules and validation mechanisms, reducing **manual allocation effort by ~50%** while improving allocation accuracy and operational compliance across Linehaul operations.
- Built **Linehaul Booking and Finance automation**, connecting transportation planning, operational execution, rate configuration, and billing into integrated workflows, reducing **manual reconciliation by ~40%** and supporting the business toward **100% system based Linehaul cost calculation**.
- Architected interconnected workflows across **5+ logistics product areas**, introducing automated validations, exception handling, and data driven decision logic that improved **transaction success rate by ~20%** and reduced operational dependency on manual processes across critical Linehaul journeys.
- Operated as an **AI native Product Manager**, embedding AI across **7+ product workflows** spanning discovery, system design, requirement analysis, SQL and data exploration, test generation, documentation, and root cause analysis, accelerating **product analysis and execution by ~40%** while improving overall delivery quality.

[Unilever](#)

• **[March 2026 – June 2026] Data Analyst and Project Manager for Category Strategy and Insight (Contract):**

- Built **3 Power BI analytics products** covering campaign effectiveness, Event & Social performance, and Beauty Advisor KPIs, consolidating fragmented marketing and operational data into centralized decision tools and enabling **40% to 60% faster reporting** for business stakeholders.
- Automated recurring **marketing and performance reporting workflows**, replacing manual data consolidation with near real time monitoring and reducing **50% of repetitive reporting effort** across Customer Strategy and Marketing activities.
- Designed **KPI frameworks and analytical models** connecting campaign activities, engagement, and Beauty Advisor productivity with business performance, improving **30% faster performance evaluation and insight generation** for strategic decision making.
- Applied **AI assisted analytics across 5+ analytical workflows**, including data exploration, anomaly detection, problem solving, insight synthesis, and management reporting, reducing **40% of analysis turnaround time** from raw data to business recommendations.

- Partnered with Customer Strategy, Marketing, and cross functional stakeholders to transform business questions into **measurable KPIs, analytical models, and automated dashboards**, shifting recurring performance reviews from manual reporting toward centralized, data driven decision making.
- **[Aug 2025 – Feb 2026] Product Owner & Business Intelligence Intern – ULIP Digital & Technology for Beauty & Wellbeing:**
 - Owned product improvements for **Retail Beauty Academy (RBA)**, an **enterprise CRM and LMS ecosystem built on Salesforce**, translating Beauty Advisor operational and learning processes into system workflows, business rules, data logic, and scalable product enhancements.
 - Redesigned **data validation, reconciliation, and governance workflows**, reducing recorded user and data issues from **200+ cases to 0** and significantly improving data reliability across downstream operational and reporting processes.
 - Built **2 Power BI performance products** integrating Beauty Advisor training, activity, achievement, and KPI data, replacing fragmented Excel based monitoring and delivering **50%+ faster reporting** for business stakeholders.
 - Developed an **AI enabled in app chatbot** as a self service information layer for Beauty Advisors, automating common information requests and reducing **30%+ dependency on repetitive manual support**.
 - Delivered system improvements across **Product, Business, Data, and Technology**, translating requirements into BRDs, data dependencies, integration logic, and UAT scenarios while improving **25% overall operational efficiency** across CRM and LMS workflows.

[Digiserve by Telkom Indonesia](#)

- **[Jun 2025 – Aug 2025] Product Manager Intern - Cybersecurity & Platform:**
 - Drove product discovery and commercialization activities across **10+ cybersecurity and digital platform products**, translating market opportunities, enterprise customer needs, and technical capabilities into product proposals, value propositions, business cases, and solution recommendations.
 - Led the end-to-end development of **2 B2B technology products: Service Management Platform and Managed Security Operations Center as a Service (SOCaaS)**, from market discovery and business modeling to product requirements, solution design, testing, and go-to-market readiness.
 - Conducted **market, competitor, customer, and business feasibility analysis** to identify product differentiation, potential use cases, target customers, and commercial value, connecting technical cybersecurity capabilities with measurable enterprise business needs.
 - Worked with technical teams to understand and structure **system architecture, service workflows, integrations, operational dependencies, and incident-management processes**, translating technical complexity into clear product requirements and customer-facing solutions.
 - Developed **50+ test scenarios** and supported the investigation and resolution of **5 production/service incidents**, strengthening product reliability while building a structured feedback loop between customer issues, technical teams, and future product improvements.

[Bukalapak](#)

- **[Feb 2025– May 2025] Product Manager Intern - Virtual Product & Data:**
 - Managed product development across **Virtual Product and Prakerja ecosystems**, translating commercial and user problems into **3 PRDs and 30+ engineering initiatives** while coordinating Product, Engineering, Partnership, Operations, and external partners through production release.
 - Led product design for an **AI powered customer service chatbot**, defining user intents, knowledge flows, response scenarios, and escalation logic to automate common inquiries and reduce **30% dependency on manual first line customer support**.
 - Delivered the **Prakerja Gamification initiative**, contributing to a **30% increase in user engagement**, while supporting platform migration toward microservices that contributed to a **20% reduction in system latency**.
 - Managed product performance across **30+ partners**, using weekly operational data to identify performance gaps while supporting **15+ seller and buyer onboardings** and resolving **10+ technical and operational issues** affecting ecosystem performance.
 - Led release readiness through **5 end to end UAT cycles**, acceptance criteria, edge case validation, and pre live sanity testing, achieving **95% critical scenario coverage** and strengthening production stability across product releases.

[Talenesia](#)

- **[Nov 2024 – Feb 2025] Product Manager Intern - Platform & Data:**
 - Led end-to-end development of the **Talenesia digital platform**, managing features such as Aptitude Tests, Career Guidance, and Events from requirement identification and product definition through development, testing, and release using **Agile Scrum methodology**.
 - Created and managed **7+ Product Requirement Documents (PRDs)** containing product requirements, user flows, functional specifications, and acceptance criteria to ensure clear communication and alignment between product, engineering, and

business stakeholders.

- Developed and maintained **60+ functional test cases** and conducted comprehensive User Acceptance Testing (UAT) across staging and production environments to validate requirements and maintain product quality.
- Monitored platform performance and collaborated with technical teams to identify, investigate, and resolve **5+ bugs across the website and Learning Management System**, ensuring stable functionality and an improved user experience.
- Scraped, processed, and validated **1,000+ job listings from JobStreet** to support platform content and data availability while maintaining data accuracy and consistency for career-related features.

[Pateron](#)

- **[Nov 2024 – Feb 2025] Product Development Intern:**

- Led the ideation, development, and implementation of **3 new products for the Pateron Indonesia Olympiad**, translating participant and organizational needs into structured product concepts and executable initiatives.
- Created **3 comprehensive Product Requirement Documents (PRDs)** covering product objectives, requirements, feature specifications, workflows, and implementation plans to guide development and stakeholder alignment.
- Maintained and optimized the **Pateron Indonesia website**, implementing product and user experience improvements that contributed to a **40% increase in website traffic compared with the previous three months**.
- Designed and implemented **2 interactive dashboards** to monitor Olympiad participants, consolidate participation data, and provide stakeholders with clearer visibility into participant activities and performance.
- Collaborated with internal stakeholders throughout product discovery, development, testing, and implementation to identify improvement opportunities and ensure proposed solutions aligned with organizational objectives.

[BASKARA.idn](#)

- **[Mar 2023 – Aug 2023] Software Developer Intern:**

- Developed and maintained **responsive, intuitive, and interactive user interfaces** for web applications, translating functional and design requirements into usable digital experiences.
- Implemented frontend and web functionality using **HTML5, CSS3, JavaScript, Java, PHP, and Laravel**, supporting the development of dynamic and responsive application features.

HIGHLIGHTED LEADERSHIP & ORGANIZATIONAL EXPERIENCE

[COMPEST](#)

- **[Feb 2024 – Dec 2024] VPIC of Business-IT Case Competition:** Assisted the PIC in organizing the Business-IT Case Competition, collaborated with XL Axiata to prepare cases for participants, targeted 150 team registrations, supervised 4 divisions, and fostered relationships with judges, mentors, and sponsors.

[BEM FASILKOM UI](#)

- **[Apr 2023 – Jan 2024] Head of Science and Student Development Department:** Responsible for organizing the Newbie Cup competition focusing on business plans. Assisting in organizing career development and student creativity, activities such as the Outstanding Student Camp, competition and scholarship information sessions, etc.

OTHERS

- Mentor (DDP-0); Staff of Documentation and Operations (EDUCARE CSUI); Staff of Public Relations, Publication, Documentation, and Creative (PEMIRA IKM CSUI); Staff of Visual Design (Wisuda Genap CSUI); Staff Creative and Documentation (BETIS CSUI); Staff of Business and Technology (Forum Ukhuwah Islamiyah Fasilkom UI) Intern Staff at Department of Information and Technology (BEM FASILKOM UI).

ADDITIONAL

Technical Skills: Jira, Trello, Confluence, Looker, PostgreSQL, SQL, A/B Testing, Python, Pandas, Geospatial Analysis, Data Cleaning, Feature Engineering, Machine Learning, Java, Digital Marketing, HTML, CSS, JavaScript, Flutter, Laravel, Excel, PowerPoint, Word, Canva, Figma, Statistics, Notion, WBS, ERP

Certifications: [BNSP Digital Marketing](#), [Goshi Digital Marketing](#), Kaggle Learn courses.

Honor and Awards: **[International, Jul 2023]** Datacamp Scholarship for AI & Machine Learning, **[National, Sept 2025]** Champion (1st) of IT Convert 2025 - Business Plan Competition, **[National, Sept 2025]** Best Speaker IDEAS 2024
